

שימוש וניהול נתונים ב-SPSS

חלק א' – מבוא

תוכן הקורס:

1. Introducing SPSS
2. Using the help system
3. Reading data
4. Using the Data editor
5. Working with Multiple Data Sources
6. Summarizing individual variables
7. Modifying data values
8. Describing multiple variable relationships
9. Creating and editing charts
10. Selecting subsets of cases
11. Working with SPSS output
12. Working with SPSS syntax
13. Multiple response variables

שימוש וניהול נתונים ב SPSS

חלק ב' – יישום ופרקטיקה

תוכן הקורס:

1. The influence of sample size
2. Data checking
3. Describing categorical data
4. Introduction
5. Exploratory data analysis: Interval scale data
6. Mean differences between groups: T test
7. Mean differences between groups: One-Factor NMOVA
8. Mean differences between groups: Two-Factor ANOVA
9. Bivariate plots and statistics
10. Exploratory data analysis: Interval scale data
